Video Description

History often paints Adolf Hitler as a lone dictator who rose through charisma and propaganda. But the truth is far more unsettling. Behind the fiery speeches and mass rallies stood a hidden web of bankers, industrialists, and international financiers who quietly fueled the Nazi machine. Without their money, Hitler's vision of a new Germany would never have left the pages of *Mein Kampf*.

This documentary uncovers the forgotten bankers who financed Hitler's rise—from German industrial titans like Fritz Thyssen, to the Reichsbank under Hjalmar Schacht, to international banks in London and New York that looked the other way for profit and power. While the world remembers the swastika, few remember the balance sheets and secret transactions that gave it strength.

By exploring this shadowy alliance of money and ideology, we reveal how global finance shaped the deadliest war in history—and why this buried truth still matters today.
